

ABOUT US

Innovative warehousing and last-mile solutions designed to accelerate digital commerce.

Leapmile Robotics delivers **innovative, intelligent, and flexible automation solutions** that seamlessly unite advanced robotics with smart software.

INDUSTRY TRUSTED

- India's Leading CNC Machinery
- Global Aviation Logistics Hub
- Digital Healthcare Fulfillment
- Global Logistics Leader
- Premium Security Solutions

ROBOT COMPONENTS

NANO WAREHOUSE

Nano Warehouse combines racking, shuttles, and carriers to enable efficient, precise, and high-speed storage and retrieval.

CUBE ROBOT

Cube Robot stores everything from parcels to high value parts, offering the most secure efficient solution for automated in-store pickups.

SHOWCASE ROBOT

Showcase Robot displays luxury goods, bespoke products, latest electronics and art in a compact, automated, and elegant self-serve system.

Shuttles:

Shuttles move bin or trays between racks, automating decanting, storage, and retrieval operations efficiently.

PICKER ARM:

Picker arm robots deliver precise, high-speed pick-and-place operations in automated environments.

AMR:

AMR transport goods efficiently, enhancing safety and overall warehouse productivity.

Secure Bay Door:

Safety Bay Doors protect operational areas, ensuring secure, controlled access during operations.

Conveyor:

Conveyors enable smooth, continuous material transfer, enhancing workflow speed and efficiency.

Totes/Bins:

Industry-standard totes with dividers create 2-8 compartments for organized storage.

Racks:

Durable aluminium racks enable high-density layouts for efficient, rapid warehouse deployment.

Trays:

Trays support varied carton sizes, maximizing infrastructure for efficient storage solutions.

Smart Door:

Smart door automate secure parcel storage and retrieval through intelligent digital access.

Scissor Lift:

Scissor Lifts provide adjustable height access for loading, maintenance, and handling tasks.
